

Manta, shimmering waves.

Manta was created featuring sinuous, undulating lines. The result is soft waves of crystal light reminiscent of being underwater. The innovative Manta is made of crystal, with a dimmable integrated led lamp focused on maximizing the crystal's reflection. Manta's organic form is available in two sizes and can be installed in numerous, customizable arrangements. Design Dodo Arslan & Nicolas Terzani.

CLEAR CRYSTAL

		LIGHT SOURCE	K011 KK	K011	K012 KK	K012	K031
230V		Replaceable LED module	1,5W	1,5W	1,5W	1,5W	3x1,5W

Manta available with integrated LED 3000K or 2700K. Different dimming options on request.

Used for centuries as a tool to both teach and communicate mathematics, the abacus was found in one form or another across the ancient world. At Terzani, we saw the beauty in the abacus' mathematical purity and clean, functional design.

Abacus, multiplying luminescence.

In the hands of Terzani's craftsmen, we've turned this inspiration into a new collection of modular pendant lamps whose flexibility allows for complex and beautiful configurations. Each module, or strand, of Abacus is made of a custom set of round, hand-blown opal glass that emits a soft and uniform light. And, as the original abacus was used to calculate everything from simple addition to complex formulas, we've retained the same scalability. Due to its customization, our Abacus light is just as suitable in a home as in a commercial space, and its almost infinite configurations ensure you always find the right solution. Design Draw.
